Continuation of 2. NOTE: The proposed amendments to independent claims 1,24,47, and 70 would require further search and consideration. Also, applicant argues that Kuba does not teach storing non-conforming format data (see paragraph bridging pages 21 and 22 of applicant's remarks filed 10/20/03). The Examiner disagrees. Kuba does teach storing non-conforming format data (see lines 5-33 of column 27 and figure 39). Specifically, Kuba teaches checking the atttibutes of the file in question (see elements S155,S156, and S157of figure 39). If there is a negative determination for all of those steps the method then proceeds to steps S158 and S159 (see figure 39). Subsequently the method checks if the header identifier is of a known type (i.e. conforming data; see step S160 of figure 39). If a negative determination is made, the method generates an alarm of impossible to reproduce data (see element S167). This stored data with the unkwnon header is the non-conforming data.
